20

25

4. A service presenting apparatus according to claim 1, wherein said predetermined information is

authentication regarding payment for the predetermined service.

5. A service presenting apparatus according to
5 claim 4, wherein the authentication regarding payment
for the predetermined service is authentication
regarding deduction of payment for said predetermined
service from user's account of a banking organ to which
he contracts regarding his portable terminal.

10

6. A service presenting method for presenting
predetermined service in accordance with an operation
of the user, comprising:

an input step for inputting access information of
15 a portable terminal;

an access step for effecting access to said
portable terminal in accordance with the access
information inputted by said input step;

a receiving step for receiving predetermined
20 information from said portable terminal by effecting
the access to the user's portable terminal via said
access step; and

a processing step for effecting predetermined
processing in accordance with the predetermined
25 information.

7. A service presenting method according to claim

6, wherein said predetermined service is input/output of an image.

8. A service presenting method according to claim
5 6, wherein said predetermined processing is charge
processing.

9. A service presenting method according to claim 6, wherein said predetermined information is authentication regarding payment for the predetermined service.

10. A service presenting method according to claim 9, wherein the authentication regarding payment for the predetermined service is authentication regarding deduction of payment for said predetermined service from user's account of a banking organ to which he contracts regarding his portable terminal.

20 11. A storing medium for storing a computer
program capable of carrying out a service presenting
method for presenting predetermined service in
accordance with an operation of the user, comprising:

```

        a program code for an input step for inputting
25    access information of a portable terminal;

```

a program code for an access step for effecting access to said portable terminal in accordance with the

a program code for a receiving step for receiving predetermined information from said portable terminal by effecting the access to the user's portable terminal via said access step; and

12. A computer program capable of carrying out a service presenting method for presenting predetermined service in accordance with an operation of the user, comprising:

a program code for an access step for effecting access to said portable terminal in accordance with the access information inputted by said input step;

a program code for a processing step for effecting predetermined processing in accordance with said predetermined information.

13. A network system in which a server computer

charge processing means for effecting processing for deducting the charge from user's account of a banking organ to which he contracts regarding his portable terminal.

processing for effecting access to said user's
15 portable terminal via in accordance with the access
information; and

15. A network system according to claim 14,
wherein a terminal of a contract company to which he
contracts regarding his portable terminal is connected
to said network, and

further comprising notifying means for notifying

the authentication to said terminal of the contract company.

16. A network system according to claim 13,
5 wherein said portable terminal is a cellular phone.

17. A network system according to claim 13,
wherein said predetermined service is information
presenting service for acquiring information from said
10 server computer.

18. A network system according to claim 13,
wherein said terminal has print means for printing out
the information acquired from said server computer.

15 19. A network system according to claim 13,
wherein the network system is connected to an external
device via said network, and

said charge processing means receives, from said
20 external device, the authentication regarding deduction
of charge from user's account of the banking organ to
which he contracts regarding his portable terminal
effected by said external device.

25 20. A network system according to claim 13,
wherein selection can be made between a system in which
the charge is deducted from the user's account of the

23. A service presenting apparatus according to claim 21, wherein said portable terminal is a cellular

24. A service presenting apparatus according to claim 21, wherein the predetermined service is information presenting service.

26. A charging apparatus for collecting charge
when predetermined service is presented in accordance
15 with request of the user, comprising:

20.

a procedure for deducting the charge from user's account of a banking organ to which he contracts regarding his portable terminal.

28. A storing medium readable by a computer and adapted to store a program for executing processing for collecting charge when predetermined service is presented in accordance with request of the user,

5 wherein:

processing for deducting the charge from user's account of a banking organ to which he contracts regarding his portable terminal is carried out.

10 29. A computer program which is stored in a storing medium readable by a computer and adapted to store a program for executing processing for collecting charge when predetermined service is presented in accordance with request of the user, wherein:

15 processing for deducting the charge from user's account of a banking organ to which he contracts regarding his portable terminal is carried out.
